NETWORK ENGINEERING: THE WORLD OF CHANGING TECHNOLOGY

Team ZDTS can provide all your CCIE level Enterprise Network design and implementation needs. From discovery phase to close-out, we pride ourselves in our white-glove service approach. Our customer satisfaction metrics are amongst the highest in the industry.

ZeroDay is a CISCO Premier Partner. Our Enterprise Networking team is comprised of engineers experienced in providing IT solutions from small single office needs to large multisite enterprise roll outs. We also provide geo diverse complex networking solutions and specialize in Route Switch, Datacenter, Security, High Availability and WAN acceleration solutions. As technology changes, ZDTS invests in our people, stays current on technology trends and embraces new technologies. ZDTS is committed to continual modernization of our skills sets.

Bottom Line: Our goal is to create, build and maintain long-lasting business relationships that outlast the technology. We are **TECH DRIVEN | PARTNERSHIP POWERED**

follow our journey

CONNECTIVITY

We connect you with your multitude of technologies and information in a meaningful way.

Enterprise Networks | We enable computers and corresponding devices across a company's multiple departments and networks to be better connected and provide easier access to data in order to create a more seamless interaction across a company's IT infrastructure.

ZDTS NETWORK ENGINEERING CAPABILITIES

ROUTE SWITCH:

- All L3 routing protocols, IPv6, WAN/LAN transport technologies
- Cisco Networking & Meraki Full Stack
- Over 40 CISCO certifications and specializations
- Deep understanding of Cisco best practices
- VMWare SDN (NSX)

DATACENTER NETWORKING

- Catalyst and Nexus Platforms (9000–1000)
- Azure Could Hybrid Networking
- ASR | ISR Routers
- ACI, iWAN, SD-WAN
- vPC, VDC, OTV, FabricPath
- APIC | Spine-Leaf ACI architecture
- Converged Fabric (Fibre Channel, FCoE)
- Cisco UCS | FlexPod

SECURITY

- Cisco ASA Firewalls | Source Fire, FirePower, HA
- Cisco Identity Services Engine (ISE)
- Cisco Email Security Appliance (ESA)
- AnyConnect | VPNs
- Citrix Netscaler
- StealthWatch (formerly Lancope)
- Palo Alto | Ironport

WAN ACCELERATION

- Riverbed Steelhead
- Cisco WAA
